Training for engg students

Bhubaneswar, May 9: The Xavier Institute of Management (XIM), here, has come up with a summer training programme jointly with Net-tech, for engineering students on Network Management (Linux Environment).

Eighty students from private and government engineering colleges will participate in it. The first batch training starts on May 17 and the second one from June first week.

Since there is a growing demand for Linux in every

area of IT industry, XIMB which has an Information Management System in place, is offering the summer programme to engineering students.

According to Dean, Information System Dr. Gopal Krushna Nayak, Linux is now finding its way into more and more companies and at XIMB more than half of the applications run in Linux platform. Practical examinations and on-line tests will also be conducted for the students. •ENS
