PANJIM: Hacking your personal e-mail account is now easy. As IIT (Kharagpur) alumnus Swapan Purkait demonstrated to the utter surprise of all journals yesterday.

At the Goa Institute of Management (GIM), he hacked the password of GUJ president Suhasini Prabhugaonkar's e-mail right in the presence of all journals.

Presently in Goa to conduct a 25-day course titled 'The first training programme in net-work management and ethical hacking' at the GIM, Purkait of

Take precautions

- Delete all spam, fictitious mail (don't ever read it)
- Do not reply to any mail from a stranger
- In a cybercafe, type wrong password before accessing your e-mail account

ATMs

- First enter wrong password
- Second time, enter the correct password to access your bank account
- Type some casual words on the keyboard after withdrawing your ATM card

NetTech is currently pursuing Doctorate studies at his alma mater. He will be imparting lessons on hacking -- and more importantly its prevention -- for a total of 125 odd students from all over the country assembled at the GIM.

Sadly, among these 125 students, only one Goan has enrolled himself for availing of the facilities at this programme.

ances of preventing hacking," remarks Purkait.

The seriousness of this phenomenon can be gauged by

the fact that Purkait has now entered Goa after conducting similar programmes in prestigious institutions such as IIT (Kanpur), IIM (Kolkata), XIM (Bhubaneswar), SMIT (Silkimm) besides his alma mater IIT (Kharagpur). However, only those websites or e-mail account in the public domain can be hacked. As such, Purkait claims that hacking into confidential websites -- particularly those of the country's defence forces -- is ruled out, as they are not accessible to the public at large. "Anything on public net can be hacked," he adds.
